## PROJECTS

---

### Secure File Sharing platform

Aug 2024

*React, Spring Boot, MySQL, Javascript*

- Developed a secure file sharing platform on the Tor network using HTML, Bootstrap, JavaScript, and MySQL
- The platform ensures anonymous and encrypted file sharing, protecting user privacy and data integrity
- Implemented a user-friendly interface with Bootstrap, server-side scripting with PHP, client-side functionality with JavaScript, and data storage with MySQL

### College Admission Management System

Jan 2025

*HTML, JavaScript, Bootstrap, MySQL*

- Developed a responsive web application using HTML, JavaScript, Bootstrap, and MySQL to streamline the college admission process
- Featuring user-friendly interfaces for student registration, application tracking, and administrative management

## INTERNSHIP

---

### Full Stack Developer Intern

Jan 2026 – Jun 2026

*TAP Academy*

- Developed and deployed full-stack applications using **Java, Spring Boot, Hibernate, MySQL, React, and REST APIs** following clean and scalable architecture
- Built backend modules with Spring Boot, implemented secure authentication, and optimized API performance
- Designed responsive React components, improved page load speed, and enhanced overall user experience

## ACHIEVEMENTS

---

### National Level Innoverse Hackathon

Our winning project, a Secure File Sharing Platform, represents a significant leap forward in data protection and user privacy. Developed a visually appealing and responsive website using HTML, Bootstrap, and JavaScript, with MySQL integration for backend data management. With a sophisticated architecture built upon an onion relay network for encryption, robust user authentication, and secure storage and distribution mechanisms safeguarding sensitive information like never before.
